

ESG Statement

Evergreen Care launched our ESG policy in April 2024. In doing so, we laid out our commitment to embedding Environmental, Social, and Governance (ESG) principles into every aspect of our operations to ensure a sustainable and resilient future for our residents, staff, and communities. Over the next 5 years, we pledge to lead by example in the nursing home sector by:

Transforming Waste Management: Prioritising recycling over general waste and implementing effective food waste reduction systems to minimise environmental impact.

Going Paperless: Transitioning to fully digital operations by Q4 2026, leveraging technology to improve efficiency and reduce resource consumption.

Optimising Water and Energy Use: Installing advanced water reduction systems, adopting renewable energy through solar panels, and reducing reliance on fossil fuels to lower our carbon footprint.

Empowering Our People and Communities

Our ESG commitment is not just about sustainability—it's about enriching lives. By embracing these principles, we will:

- Foster a healthier and more efficient workplace for our staff, enhancing job satisfaction and reducing stress through streamlined processes and a focus on well-being.
- Inspire and engage our employees through training and participation in sustainability initiatives, cultivating a culture of pride and shared purpose.
- Strengthen community ties by promoting sustainable practices and creating a positive environmental legacy that benefits current and future generations.

Our Vision

We believe that care extends beyond individuals to the planet we all share. Together, we aim to set a new benchmark in sustainable healthcare operations, ensuring that our actions today contribute to a brighter, healthier, and more resilient tomorrow for all.
